Simón Yamil Ibalo UI/UX EngineerArgentina (remote)
Portfolio · LinkedIn · simonibalo@gmail.com

SUMMARY

UI/UX Engineer with 12+ years shipping digital products, from user research and workflow design through production front-end code. 5+ years with **React** in product and enterprise teams; strong **HTML, CSS (Sass/BEM), JavaScript (ES6), React** and **Angular**; hands-on **Figma** prototyping. **Business Analyst (4+ years)**: I translate business goals into clear interfaces without ambiguity. I work in a specification-driven way. **I have worked on international teams (6+ years)**; English B2+ with day-to-day work in 100% English environments (agile ceremonies, demos, stakeholder meetings). **AI-augmented development**: Daily use of Cursor and Claude to accelerate exploration, refactoring, tests, and documentation; I review and own every line shipped.

PROFESSIONAL EXPERIENCE

UX/UI Engineer - AccelOne (client: Monetate) | Argentina–U.S. · 2024–2025

- Enterprise real-time personalization SaaS used by 100+ global brands (e.g. Adidas, Chanel, Lufthansa).
- Shipped UI improvements in a large shared codebase, coordinating gradual releases behind feature flags with product, QA, and backend.
- Contributed to a progressive migration from Google Closure to React; maintained visual and behavioral consistency across high-traffic surfaces.
- Participated in agile ceremonies and live internal demos in English with a globally distributed team.
- Used AI-assisted tools (Claude, Cursor, Github Copilot) daily for implementation, code review prep, and documentation—always validating output against design intent and acceptance criteria.

Stack: React, Flux, JavaScript (ES6), Sass/BEM, Webpack, Jest, Jenkins CI, AWS, Jira, Scrum.

UI Engineer - **Creamos** | Argentina–U.S. · 2024–2025

- Implement the CHOC brand and e-commerce experience end-to-end for a New York client - from layout and interaction design through implementation and launch.

Stack: Webflow, Shopify, HTML/CSS/JS, responsive layouts, SEO-friendly structure.

UI Engineer - DAAS | Argentina · 2024

Custom expert system for operations and traceability at a parenteral nutrition manufacturing lab (regulated, safety-critical environment).

- Reworked scaffold-generated Angular UI across the platform: semantic HTML and a consistent Angular Material + Tailwind + BEM markup and styles stayed readable and maintainable.
- Built print layouts (labels, control and preparation sheets) for plant label printers and device-specific formats under lab compliance rules.

Stack: Angular 17 (standalone), Angular Material, TypeScript, Tailwind CSS, Sass, Nx, Docker.

UX/UI Engineer - Trick Studios | Argentina–U.S. · 2021–2024

nWayPlay - NFT marketplace for the International Olympic Committee (nwayplay.com).

- Owned visual quality and front-end implementation on the core React marketplace over 2.5 years; grew into customer-support tooling (CStool) from research through production.
- Ran UX discovery, prototyping for customer support; defined flows with stakeholders after launch.
- Managed product backlog in Jira, weekly client stakeholder meetings, and delivered demos.
- **Built** configurable **metric reports** that surfaced **suspicious activity** in the marketplace.

Delivered additional Angular marketing experiences for game products.(find some demos here)

Stack: React, Material UI, Figma, Miro, Jira, HTML/SASS, JavaScript, Angular (13–15), Scrum.

UX/UI Engineer (part-time) - Mimuju EdTech | Argentina · 2018–2020

- Led discovery with DT and Agile Inception Deck for user roles (teachers, tutors, school leadership).
- Defined and designed web applications for class planning and school monitoring.

Stack: Design thinking, Invision App, Agile Inception Deck.

UI Engineer / E-commerce lead - Terciar Consultores | Argentina · 2014–2020
- Delivered 5 custom software products and 30+ web/e-commerce projects; also worked on proposals, estimates, and MVP scoping with clients.
- 2018–20: Led the e-commerce department (10 people); grew client portfolio 3× in two years.

Stack: WordPress, WooCommerce, HTML5, CSS3, Sass, JavaScript, Bootstrap, Scrum.

Technical instructor (part-time) - Government training project | Argentina · 2016–2020
- Designed and delivered web development and agile fundamentals; >50% of graduates moved into professional software roles.

Stack: Agile, Python 3.5, Django, HTML5, CSS3, RWD.

Business Analyst - Grupo Prominente | Argentina · 2014–2016
- Gathered requirements across organizational levels; prototyped ERP features for Pectra product; functional analysis for large clients (BRa, Metrovías, Emova).

Business Analyst / UI Developer — Optimal | Argentina · 2008–2011
- Functional analysis and UI development for custom-tailored software at insurance, delivery, retail, food traceability, and healthcare projects.

Skills

- **Product & UX**: user journeys, wireframes, prototypes (Figma), usability-oriented iteration, information hierarchy, workflow design, stakeholder facilitation
- **Front-end**: React (production), JavaScript (ES6), HTML5, semantic markup, CSS3, Sass/BEM, responsive layout, component reuse, REST/API integration. Also used in production: Angular (13–17), TypeScript, Angular Material, Tailwind CSS, Webflow, Shopify, WordPress
- **Quality & delivery:** feature flags, automated tests (Jest), CI (Jenkins), Git, code review, documentation, Scrum
- **AI-assisted workflow:** Cursor, Claude, Jira Rovo — specification-first prompts, validation of generated UI/code, design-system alignment

Languages: Spanish (native) · English (B2+, professional experience in all-English teams)

Education & certifications

- B.S. in Information Systems — Universidad Nacional del Nordeste, Argentina · 2001–2009
- Scrum Master Certified — Udemy · 2024
- UX Process Management — Platzi · 2025
- Modern JavaScript for ReactJS (ES6) — Udemy · 2024

STRENGHT

- **End-to-end ownership**: discovery → wireframes/prototypes → reusable components → production → iteration.
- **Design systems & consistency**: shared patterns, Material UI / enterprise UI libraries, BEM + utility CSS (Tailwind), SASS
- **Collaboration**: product, engineering, QA, and client stakeholders; demos, prioritization, reviews
- **Tools**: Figma, Miro, Jira, Git (GitHub / Bitbucket), Scrum
